

**Coordinators and contributors to the Future Planet Ecosystem track  
in the Earth Sciences Master's programme**

Many researchers from the University of Amsterdam (UvA) and the Vrije Universiteit (VU) Amsterdam contribute to education for Future Planet Ecosystem Science master's track. They are also available to discuss possible thesis research projects and provide expert supervision during projects. We encourage you to contact researchers whose interests match your own.

**Coordinators of compulsory and elective courses:**

<a href="#">Yael Artzy-Randup</a>	UvA Assistant Professor of theoretical ecology and population dynamics
<a href="#">Astrid Groot</a>	UvA Professor of evolutionary biology, sexual communication and speciation
<a href="#">Boris Janssen</a>	UvA Associate Professor of soil chemistry and land management
<a href="#">Emiel van Loon</a>	UvA Assistant Professor of statistics, research methods and computational ecology
<a href="#">Astrid van Teeffelen</a>	VU Assistant Professor of biodiversity and ecosystem services

**Other researchers contributing to the programme:**

<a href="#">Rien Aerts (M.A.P.A)</a>	VU Professor of systems ecology, climate change and earth sciences
<a href="#">Hal Caswell</a>	UvA Professor of mathematical demography, matrix population models and ecology
<a href="#">J.H.C. Cornelissen</a>	VU Professor of systems ecology, functional trait variation and evolutionary patterns
<a href="#">Marc Davidson</a>	UvA Lecturer in environmental ethics, philosophy and economics
<a href="#">Jacintha Ellers</a>	VU Professor of evolutionary biology, phenotypic plasticity and trait evolution
<a href="#">Harm van der Geest</a>	UvA Assistant professor of benthic ecology and aquatic environmental ecology
<a href="#">Kees van Gestel</a>	VU Researcher and project leader in animal ecology and ecotoxicology
<a href="#">Wouter Halfwerk</a>	VU Professor of animal ecology, signal evolution and animal communication
<a href="#">Daniel Kisling</a>	UvA Associate Professor of quantitative biodiversity science and macroecology
<a href="#">Ziga Malek</a>	VU Postdoctoral researcher in land use, resource management and spatial analysis
<a href="#">Elly Morriën</a>	UvA Postdoctoral researcher in soil ecology and ecosystem transitions
<a href="#">Gerard Oostermeijer</a>	UvA Assistant professor of conservation genetics and population viability of species
<a href="#">John Parsons</a>	UvA Assistant professor of environmental distribution and fate of organic compounds
<a href="#">André de Roos</a>	UvA Professor of theoretical ecology, community dynamics and population models
<a href="#">Nynke Schulp</a>	VU Assistant professor of ecosystem services and spatial modelling

UNIVERSITY OF AMSTERDAM

[Harry Seijmonsbergen](#) UvA Assistant professor of geomorphology, geodiversity and remote sensing

[Albert Tietema](#) UvA Assistant professor of microbial population ecology in terrestrial environments
